Sequence 7. Application US/09315127

Patent No. 6448390

GENERAL INFORMATION:

APPLICANT: THE University of Tennessee, c/o Richard Cox

ITTLE OF INVENTION: Stable Envelope Proteins for Retroviral, Viral and

TITLE OF INVENTION: Liposome Vectors and Use in Gene and Drug Therapy
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          10;

Sequence 1, Application US/09902535
; Sequence 1, Application US/09902535
; Patent No. US20020102530A1
; GENERAL INPORMATION:
; APPLICANT: Keith, Jr., James C.
; APPLICANT: McCoy, John M.
; APPLICANT: McCoy, John M.
; TITLE OF INVENTION: Methods and compositions for diagnosing
; TITLE OF INVENTION: and treating preeclampsia and gestational trophoblast
; TITLE OF INVENTION: disorders
; TITLE OF INVENTION: disorders
; TITLE OF INVENTION: MUMBER: US/09/902,535
; CURRENT APPLICATION NUMBER: US/09/902,535
; CURRENT FILING DATE: 2001-07-09
; PRIOR APPLICATION NUMBER: 60/216,657
; NUMBER OF SEQ ID NOS: 5
; SOFTWARE: FREEEE FARESE for Windows Version 4.0
; TENCING AND 1.
